

Evaluation Criteria for fish4future® Products - FLOWCHART

Wild Catch

1. STATUS OF POPULATION / SPECIES

1.1 Is a) the species and b) the population considered endangered or threatened by extinction? (IUCN Red List etc.)

1.2 Top Predators (Large marine fish, e.g. tuna, marlins, swordfish, etc.)

1.3 Reef Fish

1.4 Deep-Sea Fish

1.5 Destructive fishing methods

1.6 – 1.10 WWF SEAFOOD GUIDE

1.11 Is a recognized label available? (FairFish, FOS, MSC, Krav, etc.)

FISH

Species:
Scientific Name:
Origin (breeding or catch region; country, city, producer):

Breeding

1. STATUS OF POPULATION / SPECIES

1.1 Top Predators (large marine fish such as tuna, marlins, swordfish, etc.)

1.2 – 1.6 WWF SEAFOOD GUIDE

1.7 Is a recognized label available? (Aquagap, Bio, ASC, Naturland etc.)

2. BREEDING FARM

2.1 Does the farm have recognized certifications (ISO, HACCP, etc.)?

3. STOCK

3.1 Is the aquaculture a breeding system? (vs. fattening system)

3.2 Brood/ Young animals from own farm? (vs. capture from wild populations)

4. USE OF CHEMICALS

4.1 – 4.2 The use of chemicals is clearly regulated and the use of hormones is prohibited.

5. HUSBANDRY

5.1 Animal-friendly, species-specific (stress-free) housing for animals?

6. ENVIRONMENTAL INFLUENCE

6.1 Is the orientation towards eco-friendly husbandry (incl. Documentation)?

7. FOOD

7.1 Fish:
1) Herbivore
2) Omnivore
3) Carnivore/Piscivore

6.2 Do current efforts and available documents allow an evaluation of the farm's sustainable orientation?

6.1 Is the orientation towards eco-friendly husbandry (incl. Documentation)?

6.2 Do current efforts and available documents allow an evaluation of the farm's sustainable orientation?

7.2a FiFo < 1

7.2b FiFo > 1

7.1 Fish:
1) Herbivore
2) Omnivore
3) Carnivore/Piscivore

7.2a FiFo < 1

7.2b FiFo > 1

Does food stem primarily from sustainable sources? (Examples: plant ingredients, wisely exploited fishery or other offals) ****

Does food stem from more than > 90% sustainable sources? (e.g. plant ingredients, , wisely exploited fishery or other offals) ****

6.1 Are eco-friendly fishery methods applied?

* Or no evaluation by the WWF
** Further evaluation by fish4future®, if a.
***The granting of the label also includes principles on social responsibility, product retraceability, legal compliance and the carbon footprint (see List of Criteria).

**** See List of Criteria as well as Principles for details on how fish4future® defines sustainable sources. General: Detailed explanations on individual criteria are found in the List of Criteria as well as the Principles.
